

FEELING AT HOME ON FLATROOFS

FS10/18-S

FS10/18-S

South-facing ballasted PV mounting system for flat roofs

The FS10/18-S provides everything one might need on a flat roof. The innovative connection between rail and connector compensates temperature dilatation. Compact packing provides benefits in logistics as well as warehousing and the quick installation amazes everybody. This all-rounder offers installation on any flat roof, even on trapezoidal metal sheet and in regions with high snow load, for a surprising competitive price.

Compact

- Short rails to avoid temperature dilatation
- Only 5 system components
- For all PV panel heights

Quick and easy

- Innovative connection without nuts
- Wind deflector installation without drilling
- High mounting tolerances

Versatile

- 10° and 18° angle of inclination
- Installation on trapezoidal sheet possible
- Additional support for high snow loads
- Lightning load capacity tested
