Renusol PV-Configurator 3.0

The latest in photovoltaic assembly system layout and design

The new PV Configurator effectively cuts costs by accurately determining the components required for safe operation of the installation and displaying them as a precise blueprint. This eliminates unnecessary parts and accelerates assembly. The speed of the Configurator is also unparalleled — a proficient user can design a project in just 90 seconds.

Advantages for you

- Free to use
- Faster and easier system layout, design and ordering
- Reduced installation prices thanks to cost-efficient calculations

Quick and easy

- Project layout and design in 90 seconds
- Easy-to-edit module fields
- Google Maps building simulation function

Multifunctionality

- Implemented snow and wind load standards from 17 countries
- 9 languages
- Ordering feature

Quality

- Detailed and straightforward project report
- High-quality assembly plans in large format
- State-of-the-art structural analysis
