

Quality and environmental policy

The quality and environmental policy within the entire scope of the management system follows the expectations and demands of interested parties as well as the statutory specifications. Management is required to implement these specifications. The organisation works constructively together with all the relevant interested parties to implement the quality and environmental policy.

Our aims

- ✓ Sustainable satisfaction assurance on the part of the interested parties
- ✓ Fulfilment of the highest quality requirements for products and processes
- ✓ Increased company earning power, profitability and competitiveness
- ✓ Continued improvement across all areas and at all levels
- ✓ Promotion of a competent, motivated and involved organisation
- ✓ Environmentally acceptable behaviour
- ✓ Continuous improvement of occupational safety with the goal of “zero accidents”

Our claim

- ✓ We guarantee a personal commitment to the sustainable quality of our products and processes.
- ✓ Each employee is responsible for the quality of their performance at their workstation and for the quality of products and processes as a whole.
- ✓ We analyse and evaluate all workplace accidents with the goal of continuously improving corrective and preventative measures.

Our principles

- ✓ All relevant interested parties take the focus in everything we do.
- ✓ All products comply with the latest standards and guidelines for corrective and preventative measures.
- ✓ We succeed in implementing our management policies by setting appropriate goals, planning and adopting suitable measures and monitoring their effectiveness.
- ✓ Management hereby undertakes to maintain, develop and improve the quality management system as well as to satisfy applicable requirements.
